ANNUAL REPORTS

OF THE

TOWN OFFICERS

OF

JAFFREY, N. H.

FOR THE YEAR ENDING

MARCH 1, 1877.

PETERBORO':

PRINTED AT THE "TRANSCRIPT" PRINTING ESTABLISHMENT.
1877.

NEW HAMPSHIRE
STATE LIBRARY

SCHOOL REPORT.

The Superintending School Committee of Jaffrey herewith presents his annual report of the condition of the public schools in town, for the year ending March, 1877.

As regards the condition of the schools, we have to say the most of them have been successful. In some instances there has been partial failures. This may be due in a measure to a lack of judgment on the part of the teacher of proper discipline ; and, also, on the part of the scholars to a great lack of interest in their studies

ATTENDANCE.

This is a subject of very great importance. as on it depends, in a great measure, the success of the school. If parents could realize the importance of the regular attendance of their children, they would not suffer them to be absent from school unless it was absolutely necessary. We feel warranted in saying that if parents manifested as much zeal and devotion in looking after the interests of their schools, and devising the best methods and plans for securing the attendance and culture of their children, and put forth as much energy, planned with the same precision, and managed with the same shrewdness as in conducting

the business of their profession, farm, or shop, there would be an impetus given to our schools in the direction of progress such as would meet the wishes of the most sanguine.

TEXT BOOKS.

No subject can well exceed in importance that of changes in school books. Our Geographies as well as Readers, have been in use many years, and the rapid changes which have taken place in different portions of the globe, the methods of illustration and general arrangement of the books now published being far superior to those of the past, will soon render it necessary to change in order that the pupils may make an adequate advancement.

HIGH SCHOOL.

By a careful husbandry of the annual school fund, this town may give the means of a higher education to their older children, with but little addition to the present cost of their common schools. The money saved by a judicious reduction of the excessive number of very small schools would go far towards securing this very desirable end, and thus a large proportion of the population not enjoying the privileges of such instruction might be brought within its influence; and, at the same time, the common schools would be greatly improved, both in respect to the length of their terms and the quality of instruction imparted in them.

A high school elevates and gives character to the town, and brings it into equality and fellowship with the first class communities of the State. It makes contented those who appreciate the worth of a good education. It makes the town attractive to the bet-

ter class of citizens who may be seeking a home, and thus serves to introduce those who are of worth and honor to the community. Without such a school those who seek a higher education for their children must send them out of town to school, which excludes a majority of our children from such privileges on account of the expense. An intelligent and cultured community draws to itself other citizens of like character, and tends to exclude those who would debase it by ignorance and vice. It increases the value of the property of the town, and what is much more, it exalts the manhood and womanhood of the whole people.

DISTRICT NO. 1.

Henry F. Morse, Prudential Committee.

The Summer term of 9 weeks was taught by Mary A. Sawyer, at \$22 per month. Number of scholars registered, 20; average attendance, 18 22-88ths; number of visitors, 24.

The above sales include what has been used in connection with my drug trade, chemically and mechanically.

S. B. FISKE, Town Agent.

REPORT OF CHIEF ENGINEER.

There has been but one fire in our town during the year past, which was on April 8th, when the dwelling house owned and occupied by Rev. W. L. S. Clark, near Squantum Village, was burned. No general alarm given; no water being handy, the engine would have been of no use; the main house was burned. The Squantum people are entitled to much credit for promptness in answering to the call, and for the manner in which they managed the fire; had there been ladders about the buildings they would have been enabled to save the house.

All owners of houses should have a good supply of ladders.

The Fire Engine is in the same repair that it has been for the past three years, which is not as good as it should be. It should go to the shop and be overhauled.

We now have the full number of men in the Fire Company, having enrolled a great many new members in the past few months. The expense of the Fire Department for last year is light, the whole bill, including seven engineers' badges, new flag for engine house, repairs, pay of stewards, and pay of firemen, amounts to \$171.08.

M. M. BASCOM, Chief Engineer.

Jaffrey, Feb. 22, 1877.
